

Hybrid Cabbage Celebrate (T-541)

| | |
|-----------------------------|---|
| DESCRIPTION: | Medium to large blue-green frame. Wrap leaves provide good head cover, attractive round head, compact head development. Well adapted to fall–winter season with good uniformity for type and maturity showing high yield potential. |
| MATURITY: | Main season, 80 to 85 days to maturity |
| COMPARABLE VARIETIES: | Bronco, Blue Vantage, Pennant, Blue Dynasty |
| VARIETY CHARACTERISTICS: | Celebrate has high resistance to fusarium yellows with intermediate resistance to black rot. Plant habit supports medium-large head sizing with minimal lodging. Wrap leaves give good head protection, high onion thrip tolerance. |
| MARKETS: | Fresh and process |
| ADAPTABILITY: | Northeast/ Southeast US markets, Southwest Colorado, Texas |

FEATURES

- Upright habit
- Uniform maturity
- Attractive round shape
- Medium, low core
- High onion thrips tolerance

BENEFITS

- Mechanical harvest potential
- Effective unit cost return
- Desirable fresh pack presentation
- Good process recovery rate
- Increase in marketable heads

Descriptions, illustrations, photos and disease resistance, etc. are based upon the results obtained under favorable conditions and certain races of pathogens/diseases. Identical results are not guaranteed nor implied for all growing conditions. Information is based on average data compiled. Physical characteristics, adaptability and disease tolerance may vary under different conditions. Rev D
