

Hybrid Cabbage Cheers

DESCRIPTION:	Medium maturity, blue-green, globe-shaped head, weight approximately 5 lbs.
MATURITY:	Medium, approximately 75 days from transplant
COMPARABLE VARIETIES:	Blue Vantage
VARIETY CHARACTERISTICS:	Cheers is very uniform and has a large frame with good wrap. This variety is moderately tolerant to heat and exhibits a high resistance to Fusarium Yellows and intermediate resistance to Black Rot.
ADAPTABILITY:	Northeast, Southeast United States, and Canada

FEATURES

- Excellent uniformity
- High resistance to Fusarium / moderate resistance to Black rot
- Slow to burst

BENEFITS

- Reduced harvest labor costs
- Few disease concerns
- Good pack

Descriptions, illustrations, photos and disease resistance, etc. are based upon the results obtained under favorable conditions and certain races of pathogens/diseases. Identical results are not guaranteed nor implied for all growing conditions. Information is based on average data compiled. Physical characteristics, adaptability and disease tolerance may vary under different conditions. Rev C
