

# Hybrid Radish Relish Cross

**DESCRIPTION:** Extra slow bolting, very late to develop pithiness. Very smooth, white skin with green neck. 15 inches in length, 3 inches in diameter, weight is 1.75 pounds. Its excellent texture and relatively mild flavor make it ideal for cooking, pickling and salads.

**MATURITY:** 60 days after sowing

**VARIETY CHARACTERISTICS:** Earliest recommended sowing is when the half month average temperature reaches 60°F. May be sown in both spring and fall.

## FEATURES

- Uniform roots with smooth skin and finely textured flesh
- Strong bolting tolerance
- Spring and fall sowing

## BENEFITS

- Desirable market characteristics
- Flexible harvest
- Wide adaptability

Descriptions, illustrations, photos and disease resistance, etc. are based upon the results obtained under favorable conditions and certain races of pathogens/diseases. Identical results are not guaranteed nor implied for all growing conditions. Information is based on average data compiled. Physical characteristics, adaptability and disease tolerance may vary under different conditions. Rev B
